About us

Ritano Baragli, nowadays our president, founded the company 50 years ago, with 7 other friends. On that occasion they took the first loan to buy a modern cistern, despite their families said they were crazy... and now we are about 280 farming families who through our work contribute to growing the Cantina Sociale Colli Fiorentini, the largest producer of Chianti wine in the world. For almost 50 years we have been conserving and protecting about 1,500ha of the Tuscan landscape, we keep our traditions alive with the pride that distinguishes every Italian family in relation to its territory
