Tempranillo

VINIFICATION Spontaneous alcoholic fermentation in stainless steel tank with temperature controlled by shower; previous decision by tasting, we rack off the wine so the fermentation ends without contact with the skins. Malolactic fermentation in stainless steel tank. AGEING:9 months on 5 years old french oak barrels.

About us

We, Asier and Rodrigo, grew up here, where our parents and grandparents taught us the winemaking process very early, along with the most important thing, to understand that respect for the land, love and care of the vineyard transmits from generation to generation. "VINOS DE GUMIEL":A planet flooded with luminous vines, warm summers and winter of stove and chat, a sky of olfactory sensations and a pantry full of surprising flavors. And especially a place where each bottle of wine It has its dose of affection, enthusiasm and desire to surprise you".

Alc.:	14.00 %
Sugar:	1.20 g/l
Quality:	Denominación de Origen
